

**REPORT:** Regression testing

**AUTHOR:** Wiktoria Sapota

**2021-07:** Taskade 3.3.9 was tested in terms of usability. Was found bugs and contradictions that make it difficult to operate the program.

**2021-11:** Restests in Taskade 4.1.1

Actually version of software hasn't version notes. A reasonable idea is composing a smoke tests to regression testing will be realising in the future. The aim is created a test case set covering the main features of the software. According to rules smoke tests are based on positive scenario and correct data.

Precondition: opened browsers at website <https://profil.wp.pl/login/login.html>

Test case	Title	Step	Activity	Expected result
TC_001	Creating an account	1.	Select the „Create an account” button	Created account
