**REPORT:** Exploration report

AUTHOR: Wiktoria Sapota

Tested application: Wondershare PDFelement

Testing environment:

Session time: 60 minutes		
Time to prepare the environment and tests project: 10 minutes	Testing time: 40 minutes	Reported time: 10 minutes

Exploration ideas:

1. Checking of comparing two files possibility
2. Trying to combine two pdf files into one
3. Checking editing possibility and correctability of words recognize
4. Adding an attachment to existing pdf files
5. Creating a new pdf file
6. File optimalization for three methods
7. Opening pdf files
8. Trying to send e-mail with Wondershare using
9. Files sharing
10. Printing pdf document with other settings

Observations and comments

1. During pdfs combining to a final document was adding additional page and user wasn't information about it

2. After using any feature [open files/compare pdf/optimize pdf…] user hasn't an option „back to main menu". The User must delete or save results, close card with it and freshly come to home page.
3. OCR processing time is denpendent for the size of pdf document.
4. OCR processing doesn't recognize special characters.
5. User has a possibility to increase pdf to absurdly large sizes.
6. Tools used during editing pdf (mark, note, link text/image, watermark) are very useful and very similar to tools occuring in pay software.
